Summary

Software developer focused on backend engineering and AI/ML, with experience building Django applications, REST APIs, real-time systems, and computer vision pipelines using Python and PostgreSQL. Developed and deployed an AI-powered drone inspection system at APTRANSCO, integrating YOLO-based object detection and modular inference pipelines. Skilled in API development, database design, WebSockets, and model inference.

Technical Skills

Languages: Python, JavaScript, SQL, C
Backend: Django, Django REST Framework, Django Channels, REST APIs, WebSockets, JWT Authentication
Databases: PostgreSQL, SQLite, Database Design, Query Optimization
AI / Computer Vision: YOLO Object Detection, OpenCV, NumPy, Machine Learning, Image Processing, Model Inference
Mobile: Flutter, React Native
Frontend: HTML, CSS, Bootstrap
Tools & Practices: Git, GitHub, Postman, VS Code, API Testing
Core CS: Data Structures & Algorithms, OOP, System Design, API Design

Experience

AI/ML Developer Intern (Onsite) **May – July 2026**
APTRANSCO IT Wing (Andhra Pradesh Transmission Corporation) Andhra Pradesh, India
GitHub

- Engineered an end-to-end AI drone inspection system using Python, Django, and PostgreSQL, deployed to APTRANSCO production servers.
- Trained and integrated custom YOLO object-detection models with OpenCV pipelines, achieving 92% mAP across multiple defect categories.
- Built REST APIs and modular inference pipelines with Django REST Framework, reducing end-to-end processing latency by 40%.
- Collaborated with a 3-engineer team on development, testing, integration, and production deployment using Git.

Projects

AI Document Intelligence Chatbot | *Python, PyMuPDF, Sentence Transformers, FAISS, RAG* GitHub

- Built a document Q&A assistant that processes PDF files and answers natural-language questions using Retrieval-Augmented Generation (RAG).
- Implemented semantic retrieval using sentence-transformer embeddings and FAISS vector search to retrieve relevant document passages.
- Generated grounded answers with source-file and page-level citations, including rejection of questions unsupported by uploaded documents.

EasyApply – AI-Powered Job Application Assistant | *Next.js, TypeScript, FastAPI, OpenAI API* GitHub

- Built and deployed an AI-powered platform combining a web application and Chrome extension to streamline resume analysis, job matching, resume tailoring, and application form autofill.
- Developed FastAPI services for resume processing, structured job analysis, and explainable job matching using keyword and semantic search.
- Designed confidence-based form autofill and profile verification workflows, keeping users in control of generated content and final application submission.

Enterprise Real-Time Bus Tracking Platform | *Django, DRF, WebSockets, React Native* GitHub | Demo

- Architected a multi-role platform for admins, drivers, and students with JWT-based access control, supporting 100+ concurrent users.
- Designed 10+ RESTful APIs with pagination and query optimization to reduce response times.
- Built a React Native driver app for live location streaming, trip lifecycle management, and issue reporting.

Achievements

- Solved 170+ LeetCode problems covering arrays, sliding window, two pointers, and dynamic programming.
- Built and deployed software projects using Django, PostgreSQL, JavaScript, React Native, and REST APIs.

Education

B.Tech, Mechanical Engineering | CGPA: 7.65 2024 – 2028
Anil Neerukonda Institute of Technology and Sciences (ANITS), Visakhapatnam

Intermediate (MPC) | 94.5% 2022 – 2024
Sri Chaitanya Junior College, Tuni

SSC | 88% 2021 – 2022
ZPHS, Mangavaram
